

The WellFund knows that finding affordable healthcare coverage can be challenging. Our mission is to help you obtain approval for state programs including Hoosier Healthwise, Healthy Indiana (HIP) and Traditional Medicaid. Our team works directly with the state and keeps you informed along the way. These services are **FREE** of charge to you and your family.

Our Patient Advocates will also help you navigate community sources that are available to assist you with social matters. As your life changes, so will the programs that you may qualify for. We are here to help you now and in the future as your partner in care.

State Programs

Hoosier Healthwise - Specialized for children up to age 18 years old and pregnant or recently pregnant women that are within the income guidelines.

Healthy Indiana Plan (HIP) - Qualified adults aged 19-64 years old. HIP members benefit from having medical costs paid for and could include vision and dental coverage.

Traditional Medicaid - A health insurance program for the aged, blind and disabled who fall within the income guidelines. There is no age restriction for this coverage.

Hospital Presumptive Eligibility (HPE) - A program for emergency situations in which coverage is needed immediately. This type of application is only allowed one time per year and is available to those who fall within the income guidelines.

The WellFund Programs

Our **Marketplace Enrollment Assistance** program was created to help the uninsured or under-insured that do not qualify for Medicaid or Medicare. Our experienced agents can assist you with enrolling in a plan through the Marketplace and provide continued one-on-one support throughout your participation in the program. Premium assistance from The WellFund is available to those who qualify.

Open enrollment for these plans runs November 1st through December 15th each year for coverage beginning January 1st. You may also qualify for Special Enrollment periods outside of open enrollment.

Our **COBRA** Assistance program offers covered employees and eligible family members the opportunity to temporarily extend their health coverage at group rates when it would have otherwise ended. Premium assistance from The WellFund is available to those who qualify.

Charity and Community Resources - If you don't qualify for any of the above programs, Patient Advocates will assist you with applying for financial assistance on outstanding bills and connect you to other community resources.
